Subject: Dominion fees for existing solar customers

Dear PSC,

A few years ago, my wife and I made a very conscientious effort to do our part to help preserve the ecology by installing solar panels. This was a concept encouraged by the federal government and mandated by the state for a small percentage of customers of SCE and G. We were told that our panels would generate enough power to greatly offset our bill, and that the payoff would require several years. We have been pleased with the output of our system, although the actual payoff of our \$37,000 + investment would require much longer to achieve.

We believe that Dominion should honor our investment by not adding additional fees to our bill each month. It seems to us that this idea is contrary to the secondary reason to purchase solar: SAVE MONEY AND KEEP POWER BILLS DOWN! Please do not allow Dominion to increase our bill with fees and ensure that they honor our investment as was intended when we purchased our system in good faith.

We will welcome your response and request you deny Dominion's request for fee increases on our existing solar system.

Although this system is on our primary residence, we also have two other accounts with Dominion, so we feel as though we are already paying enough fees with our combined accounts.

Thank you for your time and consideration.

Sincerely,

George P. Cofer
